

## **Pacira BioSciences Reports Inducement Grants Under Nasdaq Listing Rule 5635(c)(4)**

December 03, 2025

BRISBANE, Calif., Dec. 03, 2025 (GLOBE NEWSWIRE) -- Pacira BioSciences, Inc. (Nasdaq: PCRX), the industry leader in the delivery of innovative, non-opioid pain therapies to transform the lives of patients, today announced the granting of inducement awards on December 1, 2025 to two new employees under Pacira's Amended and Restated 2014 Inducement Plan (the "Inducement Plan") as a material inducement to each employee's entry into employment with the company. In accordance with Nasdaq Listing Rule 5635(c)(4), the awards were approved by the People & Compensation Committee of the Board of Directors (the "Committee") without stockholder approval.

Two employees received restricted stock units for an aggregate of 2,200 shares of Pacira common stock. Each restricted stock unit represents the contingent right to receive one share of Pacira common stock and the restricted stock unit awards vest annually in four equal installments beginning on December 1, 2026.

Vesting of the equity awards is subject to the employee's continued employment with Pacira. Each equity award is also subject to the terms and conditions of an award agreement.

### **About Pacira**

Pacira delivers innovative, non-opioid pain therapies to transform the lives of patients. Pacira has three commercial-stage non-opioid treatments: EXPAREL<sup>®</sup> (bupivacaine liposome injectable suspension), a long-acting local analgesic currently approved for infiltration, fascial plane block, and as an interscalene brachial plexus nerve block, an adductor canal nerve block, and a sciatic nerve block in the popliteal fossa for postsurgical pain management; ZILRETTA<sup>®</sup> (triamcinolone acetate extended-release injectable suspension), an extended-release, intra-articular injection indicated for the management of osteoarthritis knee pain; and iovera<sup>®</sup>, a novel, handheld device for delivering immediate, long-acting, drug-free pain control using precise, controlled doses of cold temperature to a targeted nerve. The company is also advancing the development of PCRX-201 (enekinragene inzadenovec), a novel locally administered gene therapy with the potential to treat large prevalent diseases like osteoarthritis.
